***Examiner's Statement of Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance:

The prior art of record Maxfield (WO 93/04117) discloses a composition comprising clay material exfoliated with onium compounds. The onium compounds of the prior art of Maxfield include ammonium and phosphonium cations, where esters of fatty acids are listed briefly as possible substituents. The prior art of Maxfield fails to disclose combination of quaternary ammonium compounds having diester substituents in mixture with other quaternary ammonium compounds having monoesters and triesters as substituents.

The prior art of Franklin (U.S. 6,037,315) discloses use of the quaternary ammonium compounds containing mixture of mono-, di- and triesters. The ammonium compounds of the prior art of Franklin are utilized in cosmetic industry and there is no teaching of exfoliating clay material with such cations.

Newly submitted IDS discloses one reference Finlayson (US 4,450,095) having a nanocomposite, wherein clay is intercalated with onium compound. The onium compound is either methyl benzyl dehydrogenated tallow or methyl ester of the tristearyl ammonium compound. The prior art of Finlayson does not teach use of more than one ammonium compound in the nanocomposite.

Since the prior art of record fails to teach the present invention claims 1, 4-10, 12, 13, 15-20, 31-33, 35-41 and 45-47 are passed to issue.

Art Unit: 1714

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
